

How To Measure

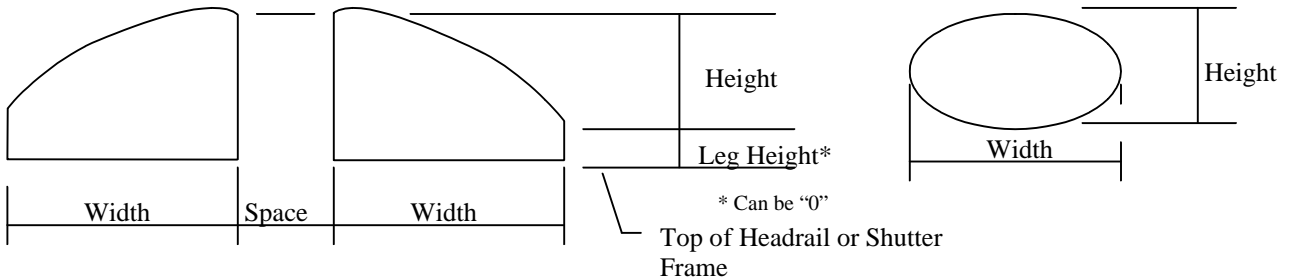

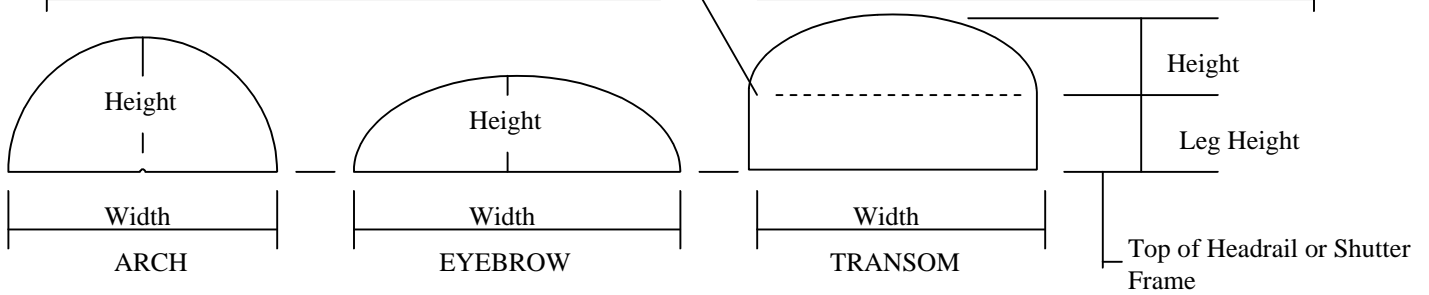

By

American Arches

We recommend that you order your arched products after careful consideration of the location of all blinds, shutters etc. to prevent any difficulty measuring your arch opening.

Always use a steel measure and take measurements to the 1/8th inch.
 Always measure and record the ***actual inside*** measurement of the arch opening.

Please note that the **start of the arch curve** to the top is the most important dimension needed.

TYPE 4 1/4 ARCH
